

Pole Mount Installation Guide

01 SITE EVALUATION

One of the primary purposes of the site evaluation is to determine your customer's needs.

This can vary from county to county; waiting on an inspection can slow your progress depending where your project is

02 PERMITTING & INSPECTIONS

03 EXCAVATION AND CONCRETE WORK

It can take up to one full day to excavate, set the pole, and pour the concrete. Depending on your mix, you may be ready to start the installation the next day, or you may need additional days for the concrete to set.

your body needs a chance to recuperate after working out, so does your brain

04 ELECTRICAL AND CONDUIT INSTALLATION

05 POLE MOUNT INSTALLATION

When it comes to the pole mount itself, the installation is typically a short process.
