

AgriBeam

SERIES MOUNTS

HIGH CLEARANCE RACKING FOR FARMS AND RANCHES

AgriBeam is high-strength solar racking that offers extra ground clearance for compatibility with all types of crops, livestock, and agriculture.

Benefits

- Ground clearance provides adaptability and longevity to solar investments
- Beefy design provides resilience
- Higher returns through reduced O&M costs
- Unmatched snow and wind resistance
- Aerial cableways allow equipment passage
- Fewer ground penetrations
- Assemble and hoist from the ground
- Made in the USA with domestic steel

AgriBeam

SERIES MOUNTS

The AgriBeam series mounts are designed for fast installation and reliable performance. The racking is optimized for 1-5 MW installations where high ground clearance, resilience, and simplicity are valued.

MOUNT SPECIFICATIONS

Engineering	Drawings stamped by a PE for all 50 States
Array Configurations	Sun gaps or full coverage
PV Module Sizes	Designs available for any size modules
Module Orientation	Landscape or Portrait
Foundation	Driven pile or concrete embedded post
Tilt	Fixed tilt
Wind Loading	Site specific: up to 180 mph
Snow Loading	Site specific: up to 350 psf
Ground Clearance	5 ft. to 10 ft.
